

DPD-5323-59

5 August 1959

MEMORANDUM FOR: Contracting Officer
THRU : Materiel Officer
SUBJECT : Procurement of Water Filters

1. The attached memorandum describes a water filter to eliminate sand and sludge from the wash section of the 70 MM processor at Detachment B. Impurities have caused unnecessary scratches and permitted formation of residual mineral deposits (after drying) on the surface of photography processed at Adana. These filters will remove sand and sludge. Separate instructions have also been sent to Detachment B covering reduction of mineral deposits through the use of counter-agent chemicals.

2. To date there has been no reported or observed requirement for filtration of photographic wash water at either [REDACTED] Therefore, it is considered necessary to procure only one set of filters at this time.

25X1

3. Recommend Eastman Kodak (ELG) be authorized to procure and ship filters, accessories, and one-year FAK listed on page one of attached memo to Detachment B.
